

**THINK BIG!**  
**We Make it Easy!**

**Eric & Tamara:**

Just wanted to let you know how impressed I am with the new FotoZoomer system. I've had it for 1 month and am impressed with so many things about it - the ease of use, the incredible quality, the diversity of formats, the looks on customers faces when they see something coming off the 44" printer, but most of all, I am impressed with the incredible customer service offered by your company.

Any question, no matter how trivial, has been answered almost immediately via a phone call or an e-mail. Your response has always been patient, professional & pleasant, your directions easy to understand. I learn something new about the system each time I speak with you. The FotoZoomer people understand that their success depends on the success that *their* customers have with the system. I appreciate that.

Our store did about \$500 the first month just from showing it to people. We currently have an in-store coupon campaign going. I have some professional photographers who use our shipping service on a regular basis. I've ask them for permission to print one of their photos out on any of the media I choose and hang them in the store above the FotoZoomer. All have gladly obliged. Having big beautiful examples on the wall has helped draw the attention of customers to the machine & high quality work it produces.

Thanks again for a great product!
