December 7, 2006

To whom it may concern:

Greer Middle School purchased a FotoZoomer in August of 2006. We have been well pleased with the technology and its very user friendly operating system. The equipment has performed as advertised and we have experienced no mechanical problems thus far. The printer had been very easy to reload with paper or change paper and the ink cartridges can be replaced very quickly and easily also.

Our school is using the FotoZoomer to produce teacher created instructional materials. All of our school wide practices have been made into poster sized prints which we printed with the FotoZoomer. We have a silent sign called "Give Me Three" and we printed 11" x 17" posters for each classroom that did not have these from last year. This enabled us to print only the amount we wanted instead of getting 50 or 100 from a commercial printer. We have also scanned in items such as a T-84 calculator and produced a 24"x 60" poster of it that has enabled our science teachers to have a life sized visual for their classrooms. We have produced 24" x 20" prints of the South Carolina Education Oversight Committee's Guide for Parents and posted those in each classroom so students, parents and teachers will know what is expected for students to know and do when they complete a grade level. GMS has a budget for each team to spend "Foto dollars" during the year for FotoZoomer produced products and each print is approved by the team leader. We have been contacted by several departments in the district office about printing large items for them and are pursuing those contacts.

Our Parent, Teacher, Student, Association is "growing" the use of the FotoZoomer as a continuous fund raiser. The association has sold photos of students at our first dance of the year and is taking orders for photos from our school sports teams. We have plans to offer more photos at our December dance and also to sell calendars with student pictures in January. Teachers have a special "employee price" for any prints made with the FotoZoomer and this is becoming a popular benefit for our staff.

Sincerely,

  
Carlton Greene
